

Literature service

During its opening hours, NSZL offers literature service for users both at the central information desks and at information desks open in the reading rooms.

In addition to that, NSZL offers custom-tailored information services for both individual and corporate users for a fee, according to the following:

- Literature search on a given topic from books and periodical publications to be found in NSZL's stock as well as from locally available databases. (We take no orders for the compilation of bibliographies for diploma works though);
- Topic alert;
- Continuous follow-up of one or more topics in the press;
- Search for articles in given volumes and numbers of periodical publications (e.g. dailies, weeklies, monthly journals, yearbooks, etc.);
- Search for images to be used by the press, TV programs, film studios and by individuals to illustrate publications or to serve as a background material for films and TV programs;
- Professional pre-press work for publishing companies, fellow institutions and members of the press, within the framework of a special cooperation agreement.

Fee for services which are not free is subject to an individual agreement with our users.
