

Digitization Center in NSZL

2020/03/06

On Floor 8 of the building of National Széchényi Library, we will soon be opening a Digitalization Center that is unique on a regional level.

In line with the plans worded in the so-called [OKR project](#) [1] (National Library System of Hungary), NSZL has expanded and redefined its service-oriented digitization activities for stock protection. As part of the project, on Floor 8 of Wing “F” of Buda Royal Palace we will soon be opening a Digitalization Center that is unique on a regional level. The center will be equipped with cutting-edge devices. You can read about the history, circumstances and future operation of the facility at digitalizalasiterv.oszk.hu [2]. (The site is available in Hungarian.)
